### 2. Vocabulary of French Origin.

The great majority of the words of St. Lucian Creole clearly come from French. In the dictionary database, there are about 3520 different lexemes with distinct etymologies. Of these, about 2950 can be confidently linked to a French source, which amounts to about 84%. This number should be higher once more etymologies can be identified.

St. Lucian Creole has a smaller, simpler more symmetrical phonology than French has. French has both rounded and unrounded front vowels while French Creole has only the unrounded set of front vowels. Also, French has a schwa vowel, which French Creole lacks.

Similarly, the French Creole set of consonant phonemes has fewer phonemes than the French set of phonemes, and is more symmetrical. Particularly, French Creole lacks the French r, which has merged with the w before the nucleus of a syllable and is non-existent postvocally.

Table 3: French vowels

Since French Creole has a simpler, more symmetrical phonological system than French has, some of the French vowels are combined in the corresponding Creole words. Specifically, the French front close rounded and unrounded vowels /i/ and /y/ correspond to only one French Creole vowel /i/, which is unrounded. Thus French *lutter* is *lité* (/lite/ ) in its Creole counterpart. Similarly the French front close-mid rounded and unrounded vowels /e/ and /ø/ are manifested as /e/ in St. Lucian Creole, as in French *noeud* and Creole *né* (/ne/). And the distinction between the French front open-mid rounded and unrounded vowels /e/ and /œ/ is neutralized in French Creole, as in French *fleur* and French Creole *fle* (/flɛ/ ).

St. Lucian French Creole lacks a schwa sound, and in the French Creole words that correspond to French words that have a schwa sound in them, the choice of a Creole vowel to replace the schwa tends to come from harmony with a vowel in the next syllable, as in French *genou* and Creole /junu/, French *menner* and Creole /mĕnñ/, French *debout* and Creole /dubut/, French *demain* and Creole /dĕmñ/, French *peser* and Creole /peze/, French *vinir* and Creole /vini/, and French *jeter* and Creole /zete/.

Table 6: St. Lucian Creole vowels

St. Lucian Creole has an English r̥ sound only in a few words of English origin, and it also has an /h/ from words that derive from French but are no longer pronounced in French with the /h/, as in Creole /huma/ from French *homard*.

Table 1 gives a sample of St. Lucian Creole words that are derived from French.<sup>1</sup> This table contains only lexical items for which a French source was identified after the *Kwéyòl Dictionary* went to press.<sup>2</sup> The majority of the lexical entries in the dictionary are already associated with a

specific French etymon. In the data presented here, etymologies marked with a question mark are tentative.

Table 7: Examples of St. Lucian Creole Vocabulary of French Origin.

### 3. Vocabulary of English Origin.

In the St. Lucian Creole dictionary database, there were 100 words that were identified as having come from English, which amounts to about 3% of the total. Only words were chosen for the dictionary that were considered borrowed, and not words that might be considered foreign, even though such English words might commonly be mixed in with Creole in normal conversation.

Note that while the borrowing of words from English and other languages into Creole usually involves some phonological adaptation, at the same time this borrowing has had the effect of extending the phonological inventory of Creole and of introducing more complex syllable structures. Note also that it is difficult in certain cases to tell whether a Creole word comes from English or from French (e.g. **dèdiké**, **désakwé**).

#### 4. Vocabulary of Indian Origin.

Most of the few words in St. Lucian Creole of Indian origin have to do with cuisine: **dal** (Hindi), **dalpouri**, **goulgoula**, **gwodja**, **kirou**, **kòri** (Tamil), **mango** (Tamil), **roti** (Hindi), **sohari** and **talkari**. There are also two words, **kouli** [< Hindi *qūlī* ‘hired servant’] and **dogla** [< Hindi *dogalaa* ‘hybrid’], that have to do with ethnicity.<sup>3</sup>

## 8. Vocabulary of Unknown Origin.

Below is a list of St. Lucian Creole lexical items for which the etymological source cannot be determined precisely. Of these, some obviously come from a French source but a precise French form that would account for the Kwéyòl form cannot be found (e.g. **ankléwant**, **finisman**, **hayisans**, **kléwé**, etc.). Many of these probably do not come from a French source.

Table 12: St. Lucian Creole Vocabulary for which a Specific Source Cannot Be Identified.

## 9. Summary.

The table and pie chart below summarize the findings with respect to sources for St. Lucian Creole vocabulary. Of the total number of lexical items in the Kwéyòl dictionary database on which the *Kwéyòl Dictionary* is based, the number of lexemes determined to have distinct etymological sources was about 3520. Of this total, the overwhelming majority (about 84%) are obviously – or in a few cases, probably – of French origin. The second most common source of vocabulary is English, with about 3%. Note again that it is a matter of judgment to say when an English word has become properly borrowed into the Kwéyòl language. Amerindian, African and East Indian sources can be identified fairly clearly for roughly ½ % of the total each. About one tenth of one percent come from Spanish or French.

Language	count	percent	adjusted
French	2950	83.8 %	95.0 %
English	100	2.8 %	3.2 %
Indian	12	.4 %	.4 %
African	17	.5 %	.6 %
Amerindian	22	.6 %	.7 %
Span./Port.	4	.1 %	.1 %
unknown	415	11.8 %	-----
